Progress Report, **April 14 2021**

Estimated Site Completion: **77%**

Features Accomplished:

- database setup
- login/register
- error handling using MDL Dialog
- create post
- view posts in index.php
- like feature (including like count per post)

Features to Improve

- profile.php customization (still a lot to do; frontend and backend)
- CSS of various site elements
- Implementation of JavaScript
-
  - Preview file data in createPost before posting

Features to add

- view LikedPosts.php - view all liked posts
- view Post - see post and add comments
-
  - Comment count should reflect on index.php post feed view
- handleAddComment - insert the comment to db

Features that would improve the technical performance of the site, but not absolutely necessary:

- AJAX for Like handling and Form Posting

Features considered for removal

- Site Footer
- Site Welcome Card

Project Post-completion Features to add: (as in, very extra stuff)

- Admin Controls -> View all posts / Delete Posts; View Accounts / Delete accounts
- Friends system between registered users. <-- Requires a lot of setup
- Security: Improve Session handling by adding session timers and constantly regenerating session keys
